PROFILE SUMMARY

B.Tech Computer Science student with strong analytical skills and hands-on experience in full-stack web development using the MERN stack. Familiar with manual testing concepts, bug life cycle, and SDLC/STLC. Looking for an entry-level role in software quality assurance or test engineering.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python, C
- **Web Development:** React.js, Node.js, Express.js, MongoDB, HTML5, CSS3
- **Tools & Technologies:** Git, GitHub, Vite, npm, Jira (basic familiarity), Bugzilla (basic)
- **Quality Assurance:** Manual testing concepts, bug life cycle, SDLC/STLC, test case documentation
- **Core Areas:** Web Development, REST APIs, Web Systems

EXPERIENCE

- Web Development Intern** 2026
Netstratum Technologies Dec 2025 – March 2026
- Built **TiffinTrack**, a full-stack Progressive Web App (PWA) for Kerala-style home tiffin delivery, connecting home cooks (Providers) with subscribers (Customers)
 - Performed manual validation of features during development, documented edge cases, and verified fixes before deployment
 - Built **Shoply**, a full-stack e-commerce app, as an initial assigned project

PROJECTS

- TiffinTrack – Home Tiffin Delivery PWA** Full Stack / MERN
🌐 github.com/HADOboi/TiffinTrack-2.0
- Built a PWA connecting home cooks with customers for daily Kerala-style tiffin subscriptions
 - Implemented OTP-based JWT auth, role-based dashboards, cutoff time enforcement, and monthly billing aggregation
 - Used React Query, Leaflet maps, Workbox offline caching, and react-i18next for bilingual (English/Malayalam) support
- Shoply – E-Commerce Web App** Full Stack / MERN
🌐 github.com/HADOboi/e-commerce-shoply
- Built a full-stack e-commerce platform using React, Node.js, Express, and MongoDB
 - Implemented product listings, shopping cart, and user authentication using Auth0
 - Designed RESTful APIs for product and user data, with a clean and responsive frontend
- Emergency Response Web Application** Full Stack / MERN
🌐 github.com/HADOboi/emergency-response-app
- Developed a location-based emergency assistance platform using React, Node.js, Express, and MongoDB
 - Integrated interactive mapping to display nearby hospitals, fire stations, and emergency services
 - Built RESTful APIs for efficient data flow with a responsive, mobile-friendly UI
- Python File Organizer** Python Automation
🌐 github.com/HADOboi/file-organizer
- Built an automated tool to categorize and sort files by type using Python's OS and shutil modules
 - Eliminated manual file organization, improving local workflow efficiency

EDUCATION

- Bachelor of Technology in Computer Science Engineering** Expected: May 2026
Ernad Knowledge City Technical Campus CGPA: 8.11/10
