PROFESSIONAL SUMMARY

B.Tech Computer Science graduate with a CGPA of **8.04/10**, specializing in building **production-grade full-stack applications** using the **MERN stack**. Currently enhancing Python development skills through an internship at Zecser Business LLP. Previously led the end-to-end development of TiffinTrack during a 4-month internship at Netstratum Technologies. Seeking entry-level roles as a Full-Stack, MERN, or Python Developer.

WORK EXPERIENCES

Python Developer | Part-time

Jul 2026 - Present

Zecser Business LLP

Remote • Kochi, Kerala

- **Developed** backend functionality for an **AI-powered hiring platform**, automating candidate screening and shortlisting for client companies.
- **Built** core API and server-side logic using **Django**, enhancing the platform's performance.
- **Collaborated** with the team to integrate **AI-driven candidate evaluation** into the hiring workflow.

Technologies / Skills Used : Python, Django

Software Developer | Internship

Dec 2025 - Mar 2026

Netstratum Technologies

On-site • Kochi, Kerala

- Identified a significant operational challenge for local tiffin providers managing orders manually via WhatsApp. Independently proposed and developed **TiffinTrack**, a bilingual PWA, as the primary internship project.
- Owned the entire stack, from **MongoDB** schema design to **React** frontend and **REST API** development, architecting a 7-collection database with OTP-based **JWT** authentication and role-based dashboards.
- Implemented offline support, interactive delivery maps, and English/Malayalam localization, enhancing usability for non-technical users.

Technologies / Skills Used : React.js, Node.js, Express.js, MongoDB, JWT, Leaflet, Workbox, react-i18next

PROJECTS

Kinetic | Website GitHub

Jun 2026 - Jul 2026

Full Stack

- **Developed** a gamified calisthenics/workout tracker for the HADO Nexus ecosystem, incorporating a Duolingo-style streak system to enhance daily user consistency.
- **Engineered** an adaptive progression system allowing users to self-report workout difficulty (Struggling/Comfortable/Too Easy), facilitating a 3-cycle progressive overload approach instead of fixed auto-scaling.
- **Created** a 7-day structured workout cycle (Push/Pull/Rest/Legs/Core) featuring equipment-aware plans (bodyweight-only or dumbbell/pull-up bar) and a shield-based streak protection mechanism.

Technologies / Tools Used : React, Node.js, Express, Firebase

Thartheel | GitHub Website

May 2026 - Jun 2026

Full Stack

- Built a **Quran habit-tracking web app** for the HADO Nexus productivity ecosystem, implementing streak tracking, progress analytics, and real-time Firestore sync using **React**, **TypeScript**, and **Firebase**
- Deployed a cloud-synced, responsive application with a focus on clean UX for daily religious habit formation

Technologies / Tools Used : React, TypeScript, Firebase Authentication, Firestore, Node.js

TiffinTrack | GitHub

Feb 2026 - Mar 2026

Full Stack / MERN

- Developed a **Progressive Web Application** to connect Kerala home cooks with daily tiffin subscribers, solving real-world order management and billing problems observed first-hand
- Implemented **OTP-based JWT authentication**, role-based dashboards, cutoff time enforcement, and automated monthly billing aggregation
- Integrated bilingual support (English/Malayalam), offline caching via **Workbox**, and interactive delivery maps via **Leaflet**

Technologies / Tools Used : React.js, Node.js, Express.js, MongoDB, JWT, Leaflet, Workbox, react-i18next

SKILLS

Databases :	MongoDB, Mongoose, Firebase Firestore
Frameworks & Libraries :	React.js, Express.js, Node.js, Django
Languages :	English, Malayalam
Programming Languages :	JavaScript (ES6+), Python, C
Soft Skills :	Problem Solving, Collaboration, Adaptability, Time Management
Tools & Platforms :	Git, GitHub, Vite, npm, Leaflet, Auth0, Workbox

EDUCATIONS

Year	Degree	Institute	CGPA/MARKS
2022 - 2026	Bachelor of Technology in Computer Science Engineering	Ernad Knowledge City Technical Campus	8.04/10
